PROJECTS

- **News Portal**, This News Portal project is a modern web app that delivers real-time news on various topics, such as cricket, finance, politics, technology, and jobs. Users can search for specific news, view articles from reliable sources, and explore category-based news feeds. Key features include a splash screen, dark mode toggle, scroll-to-top button, loading spinner, etc. The app uses the **News API** to fetch the latest articles dynamically based on user preferences and search queries, offering a clean, responsive design for easy navigation and readability.
Tech Stack: HTML, CSS, JAVA SCRIPT, NEWS API   GitHub

- **Sunglass Ecommerce Website**, Developed a fully functional and responsive e-commerce website for a exclusive sunglass store using HTML, CSS, and JavaScript. The website features an elegant and user-friendly interface designed to enhance the shopping experience.
Tech Stack: HTML, CSS, JAVA SCRIPT Website Link   GitHub

- **Travel Website**, Travia is a sleek and intuitive travel booking website designed to streamline the process of planning and booking travel accommodations and experiences. Built using HTML, CSS, and JavaScript, this front end-focused platform offers users a seamless and visually engaging experience while facilitating easy navigation and booking. Here they easily experience of bookings like Flight,Train,Bus,Hotels,etc.
